

# COVID-19 Story

sick

COVID-19 is a virus that makes people sick. A lot of people in the world are getting sick. Most people get better fast at home, but some people need to go to the hospital.

sick

You may get sick. If you are sick with COVID-19, you will have a high temperature and cough. If you feel sick, tell your mom or dad. They will know how to help you.

home

You will need to stay home and rest if you are sick. Your doctor will know if you need to go to the hospital. Your family and doctor will help

family

Someone in your family could get sick. The doctor will tell them if they need to stay home or go to the hospital.

school

Your school will be closed. We don't know when it will open again. Schools are closing in Saskatchewan to help keep everyone safe and healthy. Other places are closed too, like the daycare, library, and pool.

healthy

You can help stay healthy by staying home, washing your hands often, eating well, and sleeping well. Listen to your parents and the doctors to stay healthy and safe.
